

CSE0001 – Digital Literacy

Project Assignment Brief

Field	Details
Course Code	CSE0001
Course Title	Digital Literacy
Credits	1 Credit Pass / Fail (Non-CGPA)
Target Students	First Year B.Tech – All Branches
Deliverable	GitHub Repository + README + Project Report (.docx / .pdf)
Submission Mode	Share GitHub repo link via VITyarthi portal
Total Marks	100 marks (internal project assessment)

The Scenario

You have just been selected as a Student Digital Ambassador at your college. Your role is to help your peers navigate the digital world — from creating professional online profiles, to communicating safely and responsibly online. Your first assignment is to build a Digital Literacy Portfolio that you will present to the faculty committee and share with your batch.

To complete this assignment, you will work through five tasks — one for each module of this course. All your work will be organized in a single GitHub repository, which is itself part of the deliverable. At the end, you will submit a written project report documenting your work, observations, and reflections.

No prior coding knowledge is required. Every tool you need is free and browser-based.

What You Must Submit

Your final submission must be a single GitHub repository containing the following structure:

File / Folder	What it should contain
README.md	Project overview, your name/reg no., module summaries, links

File / Folder	What it should contain
report/Project_Report.pdf or .docx	Full written report covering all 5 tasks
task-1-presentation/	Canva/Prezi link or exported image, brief description
task-2-portfolio/	Screenshots of profiles set up, reflection notes
task-3-platforms/	Platform screenshots, activity proof, notes
task-4-email-etiquette/	Sample email drafts, etiquette checklist
task-5-cybercrime/	Case study writeup, prevention checklist

Tip: Setting up a GitHub account and creating your first repository is itself part of the learning. Step-by-step instructions for creating a GitHub repo are provided in Appendix A of this document.

Project Tasks

Each task maps directly to one module of the course. Complete all five tasks and document each one in your project report.

Task 1	Create a Digital Literacy Awareness Infographic	<i>Module 1</i>	20 marks
-------------------	--	-----------------	-----------------

As the Student Digital Ambassador, you need to create a one-page visual resource that helps your batchmates understand what Digital Literacy means and why it matters.

You must:

1. Use Canva, Prezi, Miro, or any free presentation/design tool of your choice.
2. Create a single infographic or visual slide that covers at least 3 of the following topics: what digital literacy is, useful digital tools for students, safe internet practices, professional online presence, email etiquette.
3. Export or screenshot your final design and add it to the task-1-presentation/ folder in your repository.
4. In your project report, write 150–200 words describing: which tool you used, what your design shows, and one thing you found difficult or interesting while making it.

Suggested tools: Canva (canva.com) | Piktochart (piktochart.com) | Prezi (prezi.com) | Google Slides with a SlidesCarniVal template (slidescarnival.com)

Task 2	Build Your Student Digital Portfolio	<i>Module 2</i>	20 marks
-------------------	---	-----------------	-----------------

A professional digital presence is no longer optional — it is expected. In this task, you will set up your foundational portfolio across the key platforms that employers, internship coordinators, and the academic community check.

You must:

5. Create or update accounts on at least three of the following platforms: GitHub, LinkedIn, Kaggle, Stack Overflow, ResearchGate.
6. On GitHub: create a profile README (a special repository named after your username) with at least your name, branch, year, and one sentence about what you hope to learn.
7. On LinkedIn: fill in your Education section with your current degree, institution, and expected graduation year.
8. Take a screenshot of each profile you have set up and add them to the task-2-portfolio/ folder.
9. In your project report, write 150–200 words on: which platforms you chose, what each one is used for, and how you plan to use them over the next four years.

Note: You do not need a photo or contact details on any platform. Use your college email for sign-ups. Keep all profiles professional and minimal at this stage.

Task 3	Explore Coding & Collaboration Platforms	Module 3	20 marks
-------------------	---	----------	-----------------

As a Digital Ambassador, you need to be able to guide your peers toward the right online tools for studying, practising, and collaborating. This task builds familiarity with two categories: coding practice platforms and cloud collaboration tools.

Part A – Coding Practice (choose one):

10. Create an account on HackerRank, CodeChef, or HackerEarth.
11. Complete at least one beginner-level challenge or skill test (e.g., HackerRank's 'Solve Me First' or the Python Introduction challenge).
12. Take a screenshot of your completed challenge and the badge/score (if any). Add it to task-3-platforms/.

Part B – Google Workspace Collaboration (mandatory):

13. Create a Google Form with exactly 5 questions that could be used as a 'Digital Literacy Awareness Quiz' for your batchmates. Include at least one multiple choice question and one short answer question.
14. Share the form link in your README and add a screenshot of the form and the linked Google Sheet (response view) to task-3-platforms/.
15. In your project report, write 150–200 words on: what platform(s) you used, what you built or practised, and how these tools will help you academically.

Tip: The Google Form you build here could actually be used to quiz your batchmates as part of your Digital Ambassador role. Think of it as a real deliverable, not just an exercise.

Task 4	Draft a Professional Email & Etiquette Guide	Module 4	20 marks
-------------------	---	----------	-----------------

As a Digital Ambassador, one of your responsibilities is teaching your peers how to communicate professionally online. This task tests whether you can apply email etiquette yourself, and whether you can communicate those rules clearly to others.

Part A – Write two professional emails:

Email 1 — Write an email from a student to their professor requesting an extension on an assignment submission deadline. The email must follow all professional email rules.

Email 2 — Write an email from a student to an internship coordinator at a company, expressing interest in a summer internship opportunity.

Both emails must include: a clear subject line, a professional greeting, a well-structured body, and a proper sign-off. Save both drafts as plain text or a Word/PDF document inside task-4-email-etiquette/.

Part B – Create a Social Media Do's and Don'ts checklist:

16. Create a simple checklist (can be a table or a bulleted list in your report) with at least 5 Do's and 5 Don'ts for responsible social media use as a college student.
17. Add this checklist inside task-4-email-etiquette/ as a separate file called social-media-checklist.md or .txt.
18. In your project report, write 100–150 words on: one situation where poor digital communication caused a real problem (this can be something you read about or a hypothetical scenario), and what could have been done differently.

Marking note: Emails will be evaluated on subject line quality, tone, structure, and correct use of salutations and sign-offs — not length. A short, well-written email scores higher than a long, poorly structured one.

Task 5	Cybercrime Awareness Case Study & Prevention Guide	Module 5	20 marks
-------------------	---	----------	-----------------

As a Digital Ambassador, you are expected to help your peers recognize and avoid online threats. This task requires you to research a real or realistic cybercrime scenario and produce an awareness resource.

Part A – Case Study:

19. Choose one of the following cybercrime types: Phishing, UPI/Online Payment Fraud, Identity Theft, Cyberbullying, or Ransomware.
20. Write a 200–250 word case study describing: what the crime is, how it typically happens (step-by-step), who is usually targeted, and what the consequences are.

You may use a real published incident (with source) or write a realistic fictional scenario.

21. Add your case study to task-5-cybercrime/ as casestudy.md or casestudy.pdf.

Part B – Prevention Checklist:

22. Create a 'Stay Safe Online' checklist with at least 8 specific, actionable prevention tips relevant to college students in India.

23. At least two tips must be specific to financial/UPI safety.

24. Include the reporting channel: National Cyber Crime Portal (cybercrime.gov.in) and Helpline 1930.

25. Add this checklist to task-5-cybercrime/ as prevention-checklist.md or .txt.

26. In your project report, write 100–150 words on: what surprised you most while researching this topic, and one habit you will personally change as a result.

Note: You are not required to report any personal incidents. If at any point during this task you feel uncomfortable with the material, you may work with the fictional scenario option and skip the real-incident research.

Marking Scheme

Component	What is Evaluated	Marks
Task 1 – Infographic	Tool used, visual quality, topic coverage, reflection write-up	20
Task 2 – Digital Portfolio	Platforms set up, completeness, GitHub README quality, reflection	20
Task 3 – Platforms	Coding challenge completed, Google Form quality, reflection	20
Task 4 – Email Etiquette	Email structure & tone, checklist completeness, scenario write-up	20
Task 5 – Cybercrime	Case study accuracy & detail, checklist quality, reflection	20
Repository Structure	Correct folder structure, all files present, README complete	Bonus: 5
TOTAL		100

Pass mark: 50 out of 100. This project is graded as Pass/Fail and does not count toward your CGPA. However, your GitHub repository will remain as part of your permanent digital portfolio.

Project Report Format

Your project report must be submitted as a .docx or .pdf file inside the report/ folder of your repository. It should follow this structure:

Section	Content Required	Approx. Length
Title Page	Name, Reg No., Branch, Year, Course Code, Date	1 page
Introduction	Brief overview of the project and the scenario	100–150 words
Task 1 Write-up	What you made, tool used, reflection	150–200 words
Task 2 Write-up	Platforms set up, purpose, future plans	150–200 words
Task 3 Write-up	Platforms used, what you built/practised	150–200 words
Task 4 Write-up	Communication scenario, key learnings	100–150 words

Section	Content Required	Approx. Length
Task 5 Write-up	What surprised you, one habit you will change	100–150 words
Conclusion	Overall learning from the project	100 words
References	Any sources, tools, or platforms cited	As needed

Font: Arial or Times New Roman, Size: 12pt, Line spacing: 1.5, Margins: 1 inch on all sides.

Academic Integrity & Originality

- All written reflections must be in your own words. Copy-pasting from the internet will result in a Fail grade.
- You may use AI tools (like ChatGPT or Claude) to understand concepts, but the final write-ups must reflect your own understanding and experience.
- If you reference any external source (article, website, video), cite it in the References section.
- Screenshots must be of your own accounts and work — not borrowed from others.
- Collaboration is encouraged for understanding, but the submission must be individual. Each student submits their own repository.

Appendix A – How to Create Your GitHub Repository

If you have never used GitHub before, follow these steps:

27. Go to github.com and click Sign Up. Use your college email address.
28. Verify your email and complete the account setup.
29. Click the '+' icon in the top-right corner and select New repository.
30. Name the repository: digital-literacy-project. Set it to Public. Check 'Add a README file'. Click Create repository.
31. You now have a live repository. Click on the README.md file and then the pencil icon to edit it directly in the browser.
32. To add files: click Add file > Upload files and drag in your screenshots, notes, and report.
33. After uploading, click Commit changes to save.
34. Copy the URL from your browser (it will look like: github.com/yourusername/digital-literacy-project). This is what you submit.

You do not need to install anything. All of the above can be done entirely in the browser at github.com.

Appendix B – Useful Links Quick Reference

Task	Tool / Platform	URL
Task 1	Canva (infographics)	canva.com
Task 1	SlidesCarniVal (PPT templates)	slidescarnival.com
Task 1	Prezi	prezi.com

Task	Tool / Platform	URL
Task 2	GitHub	github.com
Task 2	LinkedIn	linkedin.com
Task 2	Kaggle	kaggle.com
Task 3	HackerRank	hackerrank.com
Task 3	CodeChef	codechef.com
Task 3	Google Forms	forms.google.com
Task 5	Cyber Crime Portal	cybercrime.gov.in
Task 5	Cyber Crime Helpline	1930 (24x7 phone)
